INVITATION TO ATTEND

Dear Colleagues

The 34th Congress of the International Council of the Aeronautical Sciences (ICAS) will be held in Italy, Florence, at the Palazzo dei Congressi and Palazzo degli Affari, from the 9th to the 13th of September 2024, hosted by AIDAA, the Italian Association of Aeronautics and Astronautics.

AIDAA, founded in 1920, is recognized as the second oldest scientific aerospace society in the world and it is member of ICAS, CEAS (Council of European Aerospace Societies) and IAF (International Astronautical Federation).

AIDAA is a national non-profit cultural association that promotes the advancement of aeronautical and space sciences through the organization of dissemination events, life-long education activities, and through the publication of the international scientific journal “Aerotecnica Missili e Spazio – Journal of Aerospace Science, Technologies and Systems”, edited by Springer. The members of AIDAA are industrial and academic experts in the field of aeronautics and space, young professionals and students, as well as aviation and space enthusiasts. Since the first decades of the XIX century, many of the most eminent Italian industrialists and designers, together with professors and scientists were members of AIDAA, to testify the leading role of the association in the field of aerospace studies and researches at that time.

As witnessed by the long-standing cultural association AIDAA, Italy has a remarkable tradition in aeronautics that dates back one hundred years. Today the Italian aerospace industry represents the largest manufacturing sector in Italy in the field of high-tech integrated systems. The Italian aerospace ecosystem is widespread and diverse, including research centers and academic institutions, in addition to large and medium enterprises, that carry on activities that cover the entire spectrum of the aerospace field and are at the forefront of the research.

AIDAA and the whole Italian aeronautic eco-system is proud to host the ICAS 2024 Congress in Florence.

The Congress will be a unique opportunity for companies and research centers to showcase their commitment to shape the future of aviation and an excellent chance of networking among companies, research centers and universities, thus bringing together different perspectives to foster the flourishing of new ideas. The involvement of undergraduate and graduate students and professionals in this international event is fundamental to us. AIDAA will pursue this purpose through its student affiliated associations and local sections in the nine Italian Universities that offer a Master Degree in Aerospace Engineering, including the University of Pisa and Florence. Our Universities will commit themselves to maximize the involvement of students, researchers and professors.

Italian companies, research centers, and governmental institutions have endorsed this initiative and have offered their support to organize an exceptional edition of the international ICAS Congress to provide professionals and young attendees with an extraordinary and very exciting program.

Florence will be the ideal location for this edition of the ICAS Congress. Florence is one of the most famous cities in Europe and the capital of the Italian Renaissance. Its museums, historical buildings and churches host some of the most prestigious artistic treasures of the past centuries.

Let us invite you to participate to this important scientific and technical event for aeronautics and to become an exhibitor or partner. The attached prospectus contains details about various exhibitor and partnership programs.

*We look forward to welcoming you to ICAS 2024
in Florence in September 2024.*

Prof. Erasmo Carrera
President, The Italian Association of
Aeronautics and Astronautics (AIDAA)

ABOUT

International Council of
the Aeronautical Sciences

The International Council of the Aeronautical Sciences is an international, nongovernment, non-profit scientific organisation with the mission to advance knowledge and facilitate collaboration in aeronautics.

Established in 1957, ICAS is the international support organisation to represent engineering professional societies and their members.

Member Societies

Deutsche Gesellschaft
für Luft- und Raumfahrt
Lilienthal-Oberth e.V.

ORDEM
DOS
ENGENHEIROS
PORTUGAL

Currently ICAS has Member Societies from 27 countries and in addition 36 Associate Members from all sectors of the aerospace industry, which are dedicated to the advancement of aeronautics and aimed to encourage international dialogue relevant to aeronautical research and technology. ICAS membership is open to all countries and provides a forum for industry players to discuss common problems in aeronautical science, research and technology.

Today ICAS has established itself as the leading international forum for exchange between scientists and engineers working in aeronautics in all countries of the world.

ABOUT THE CONGRESS

The 34th Congress of the International Council of the Aeronautical Sciences (ICAS 2024) will be held on 9-13 September 2024 at the Firenze Fiera Congress & Exhibition Center, Florence, Italy.

The ICAS congress is a biennial event which brings together world's aeronautics experts and the entire international scientific aerospace community to discuss, understand and compare worldwide scientific and technological advances. The Congress provides the ideal opportunity to move aeronautical research and technology progressively forward, particularly with regards to the environment and sustainable development.

Up-to-date scientific achievements in aeronautics and priority projects to design new generation aircraft and engines, constitute essential topics of the Congress and reflect the aspirations of the aeronautical community.

In addition to core aeronautical disciplines such as Aircraft Design, Materials and Structures, System and Subsystems, it also addresses emerging technologies that lead to improved performance, a cleaner or quieter environment or more agile development processes.

The Congress will attract leading aviation experts, engineers, scientists and Ph.D. students from all over the world who will have the opportunity to:

- Present their work to an informed and truly global audience.
- Hear the latest developments from internationally recognised experts.
- Exchange information and opinions with colleagues from around the world.
- Develop collaborative relationships.
- Build long lasting friendships and networks with colleagues in other countries and cultures.
